# An Open Source GIS Conference!

2007 FREE AND OPEN SOURCE SOFTWARE FOR GEOSPATIAL (FOSS4G) CONFERENCE
VICTORIA CANADA ◆ SEPTEMBER 24 TO 27, 2007

The 2007 Free and Open Source Software for Geospatial (FOSS4G) Conference brings together the people and companies who create, use and support open source spatial software.

Meet the developers behind the software, learn from organizations implementing open source GIS, take advantage of hands-on workshops and labs to learn!

FOSS4G is presented annually by the Open Source Geospatial Foundation (OSGeo).

JOIN THE WORLD IN VICTORIA, CANADA!

Major topics for 2007 will include:

- Case studies of open source implementations
- Open standards support and implementation of emerging standards
- Practical workshops on using and developing open source geospatial tools
- Deploying on open source, using Mapserver, Mapguide, PostGIS, GRASS, Worldwind and other tools as the basis for operations
- Interoperability between open source and proprietary software

FOSS4G CONFERENCE HIGHLIGHTS:

WORKSHOPS & LABS

- Hands on instruction
- Mapserver, MapGuide, Google Earth
- PostGIS, QGIS, GRASS
