

2008 FREE AND OPEN SOURCE
SOFTWARE FOR GEOSPATIAL CONFERENCE

INCORPORATING GISSA 2008

29 SEPTEMBER - 3 OCTOBER 2008

"Open Source Geospatial: An Option for Developing Nations"

Do you know how Free and Open Source Geospatial ('FOSS4G') software can be used in addressing the challenges in developing nations?

Don't miss the most important GIS conference in Africa this year. Because with over 120 Presentations, 26 Workshops and Labs for hands-on FOSS4G experience, live demos, leading international speakers and a mix of proprietary and open source content, this conference is for all geospatial software developers, vendors, users and decision makers.

Exhibitors secure your stand now! Download the Prospectus from the website for details.
