

17th-23rd September

The annual gathering of Open Source Geospatial Developers, Users and Leaders. At Nottingham's new East Midlands Conference Centre in the heart of the country.

17th-23rd September

The annual gathering of Open Source Geospatial Developers, Users and Leaders. At Nottingham's new East Midlands Conference Centre in the heart of the country.

# The Global Conference For Open Source Geospatial Software

# The Global Conference For Open Source Geospatial Software

## Presentations

Short talks on Open-Source Geospatial software. From case studies and development plans to new hacks and mashups and the latest techniques. 30 minutes for all the action.

## Workshops

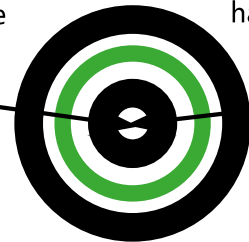

Presenting new techniques or getting a grounding in an existing one? Flexible workshops are for you. Open-source experts on-hand to help you up the learning curve.

## Academic Papers

The latest innovation from the academic community, for presentation and publication in reviewed journals.

## Map Exhibition

Our ground-breaking mapping exhibition will combine the best of digital and paper maps in a stunning gallery presentation.
