

Review Form Response

Review FOSS4G Academic Track Submission

This form is for reviewing a FOSS4G Academic Track Submission.

Remarks to the editors *

revision of this paper is needed - it feels unfinished with very short implementation section.

Remarks to the author

Interesting, highly theoretical paper with relatively weak implementation section and use case (just a figure). A revision with illustration of the presented theory using specific data and a non-trivial model application would make the paper more relevant to the conference

Recommendation *

- Strong Accept and recommendation for inclusion in Transactions in GIS
- Strong Accept
- Weak Accept
- Reject
