

Review Form Response

Review FOSS4G Academic Track Submission

This form is for reviewing a FOSS4G Academic Track Submission.

Remarks to the editors *

This paper present and important and interesting topic, the creation of Spatial Data Infrastructure using FOSS/FOSS4G. I think it would be important to publish it because it will provide a great example for other countries. Having said this, the paper needs revised and enhanced. Here is where the document I sent you on how to write a scientific paper would be of help for this author(s).

Remarks to the author

I have made comments and editions in the body of the text in the attached file. Please have the final version reviewed by an English native speaker. The English is very good, but it needs some minor tuning. The editors my send you a document containing guidelines for writing a paper. Very useful for your reviews.

Recommendation *

- Strong Accept and recommendation for inclusion in Transactions in GIS
- Strong Accept
- Weak Accept
- Reject
