Review Form Response

Review FOSS4G Academic Track Submission

This form is for reviewing a FOSS4G Academic Track Submission.

Remarks to the editors *

> The submission presents an overview of AEGIS framework. It lists the framework's features and discusses its architecture from a very high level of abstraction. It also provides some details on indexing structures implemented within the framework and shows some results of experiments performed with the use of this framework.
> The submission is rather technical (an overview of the framework implemented) than theoretical (the research problems tacled are limited to the description of the implementation of temporal indexing).
> However, the submission feets very well to FOSS4G scope.
> My suggestion is to accept with corrections.

Remarks to the author

> The paper presents an overview of AEGIS framework. It lists the framework's features and discusses its architecture from a very high level of abstraction. It also provides some details on indexing structures implemented within the framework and shows some results of experiments performed with the use of this framework.

Recommendation *

- ◉ Strong Accept and recommendation for inclusion in Transactions in GIS
- ○ Strong Accept
- ○ Weak Accept
- ○ Reject
