Review Form Response

Review FOSS4G Academic Track Submission

This form is for reviewing a FOSS4G Academic Track Submission.

Remarks to the editors *

> Interesting work though it's not good enough to appear on a journal.
> Thanks for invitation to review this.

Remarks to the author

> Interesting work and the paper is quite lengthy. However, some details are not presented clearly.
> Strong emphasis on complex data source but unclear how 3 proposed gestures help to explore/visualise the data.
> The range of score 1-20 seems so wide?
> Is it necessary?
> The presenting graph is also confusing? E.g., "frustration" high score means more or less frustration?
> Some of your discussion clearly point out the weakness of the presenting work.
> It's recommended to present this experimental results but so soon to have it published as a journal paper.
> Look forward to having more concrete results.

Recommendation *

- ○ Strong Accept and recommendation for inclusion in Transactions in GIS
- ◉ Strong Accept
- ○ Weak Accept
- ○ Reject
