To  
The OSGeo Conference Committee

14<sup>th</sup> May 2012

Dear Committee,

On behalf of Geofutures, I am pleased to support the UK Organizing Committee's bid to host the Free and Open Source Software for Geospatial (FOSS4G) Conference in 2013 in Nottingham, UK.

As a boutique business specialising in the understanding of sustainability and resilience issues, geo-information tools underpin the work we do. Our geo-analytical platform is based on open-source technology and we welcome the opportunity to get together with, to share and learn from, other people and organisations in this sector. Nottingham University also has a strong reputation in this field and would be an ideal location for the Conference. The linkage with the annual AGI conference also makes this event as a "must-go" next year.

We look forward to actively participating in the FOSS4G Conference and encouraging the open source geospatial community to join us in Nottingham for FOSS4G 2013.

With kind regards,

A handwritten signature in blue ink, reading "Mark Thurstain-Goodwin". The signature is written in a cursive, flowing style. It is positioned to the left of a vertical line that extends from the top of the signature area down to the bottom of the page.

Mark Thurstain-Goodwin
