

# PDX Chapter Report

## Chapter Events

The chapter held monthly meetings with numerous presentations. They also hosted an unconference. See the box for more information on the unconference talks.

Many chapter members presented at regional GIS conferences on OSGeo topics.

## Key Accomplishments

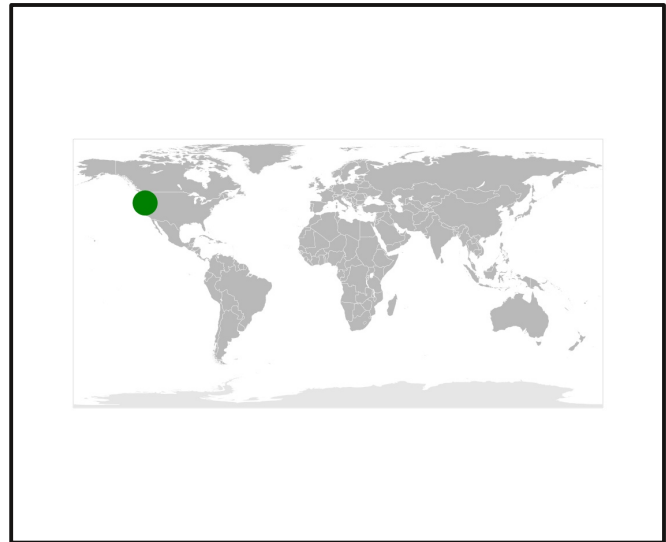

Chapter members started taking better notes and using the wiki. They finished most of the OSGeo Local Chapter checklist.

## Opportunities to Help

The chapter is looking for people to join the planners list and help schedule presentations, post meeting announcements, and perform other planning tasks.

## Outlook for 2012

The chapter looks forward to greater meeting attendance and the need for a larger meeting space.

## 2011 PDX Unconference Talks

- Civic Apps, OSM, and Authoritative Data
- Crises Mapping: rdtm.org
- State of Oregon Services and Standards
- Open Street Maps HowTo
- Building Minecraft Maps With USGS Data
