OSGeo

# Get involved in 2013
Google Summer of Code

The *Google Summer of Code* program is designed to encourage student participation in open source software development. The *Open Source Geospatial Foundation* is looking for students to join us in making 2013 the best Summer of Code yet! We'll be offering successful student contributors a $5,000 USD stipend, enabling them to focus on their coding projects for three months in a fun and welcoming community.

The project ideas range from the depths of computer science graph theory to the heights of 3D visualization and challenging cartography.

Involved projects: **GDAL, GeoServer, GEOS, GRASS GIS, gvSIG, istSOS, Mapnik, PostGIS, Quantum GIS, OpenStreetMap, Opticks, OSGeo4W, OSSIM, uDig**, ... *and more!*

Your own ideas are more than welcome too – they're encouraged.

Student applications open :
22 April – 3 May 2013
